ROBERT W. HEBBERD.
Commissioner. lease has agreed to take up the work of development at once, and will begin to sink working shafts at an early date in preparation is some two hundred miles from the new steel town of Gary.

The Cleveland Cliffs Iron Company has been drilling for some time on a large tract of land lying west of Ishpeming on the Marquette iron range. In addition the company has taken many options and has explored some of them. Several excellent indications have been met with at various points, and several seams and leases of ore of fair to good quality have been cut. One of these is on the shore of North Lake, in township 47-28, where

have been cut. One of these is on the shore of North Lake, in township 47-28, where a presumably good body of ore is found. It is of sufficient importance to call for a shaft and this will be sunk at once. Buildings for men and material are under way.

The ore bearing formation extends west from Ishpeming a long way, at least as far as L'Anse and the base of the peninsula, but the actual discoveries of merchantable deposits of iron ore here have been very few. Work on the Rogers-Brown operation on the Cuyuna, drowned out two weeks ago, has been resumed. The drop shaft was put down about 12 inches last week, so it is now some 91 feet deep.

The Cleveland Cliffs Iron Company is pushing the installation of its new town site of Gwinn on the Cascade range in Michigan. The work is carried on with the most advanced ideas of landscaping.

At the Pewabic mine, Menominee range, a recent raise in No. 1 workings encountered a cavern or vug about 65 feet in length, 35 leet width and 25 feet average height. This cave was entirely lined with calcite crystals and iron pyrites and presented a most beautiful spectacle. At No. 1 shaft the installation of a new hoist has compelled the retimbering of the shaft, and work has been stopped for the time being. Both 1 and 2 shafts have been such another level and the fine steel shaft house at No. 1 is completed.

Pittsburg Encouraged by Latest Develop-ments in Pig-Price Conferences.

PITTSBUNG, May 17.—A sudden demand for pig iron developed on Friday and Saturday of last week which came as a surprise to the furnace owners and pig iron brokers. The market had been so stagnant during April and May that producers had lost hope of selling any quantity of metal during the first half of the year. The Sloss-Sheffeld Steel Company led off with sales of 60,000 tons from their stock pile which they had said they did not possess. The sales were made at \$11.50 per ton Birmingham. Other orders brought the total sales for the last few days up to 100,000 tons, which is the greatest week buying since last summer. to Pittsburg that his company had disposed of 10,000 tons of pig iron in one order, which is the largest single order placed in the West

of 10,000 tons of pig iron in one order, which is the largest single order placed in the West since last summer.

Since the Southern pig iron producers reduced the price of foundry iron to 11.05 for No. 2 grade there has been more inquiry owing to the low price. It has been demonstrated, say consumers, that if the iron and steel producers will make the prices attractive so as to conform to the financial situation the people will buy. The same argument wilf be produced at the meeting of the steel producers, who are to meet in New York, beginning to-morrow.

It is doubtful, however, if the steel committee will recommend the reduction of prices to the general committee, which will meet later in the week in New York. The Carnegie Steel Company has ordered repairs commenced on the 30 inch plate mill and work is being rushed on a large metal mixer for No. 4 open hearth plant, while the whole plant is receiving a general overhauling preparatory to a rush of orders expected during the summer, and the fall. There are no stocks of finished material at any of the mills.

There has been a stiff advance in the price of ferro-manganese and the minimum price is \$45 for spot and \$45.50 for future delivery.

New business in finished material continues light. A humber of small orders have accumulated within the last few weeks, which warranted the starting of several idle mills. Among them were the upper and lower mills of the Carnegie Steel Company in Pittsburg. This company also started the idle structural mills at the Homestead works and all ase now running to full capacity. The Singer plant of the Carter iron and Steel Company at Havs station, near Pittsburg, also started.

The sheet average also remains unchanged, the average selling price of Nos. 26, 27 and 28 gauges being 2.30 cents, the base of the wage scale.

Sales of tin plate for the last two months brought the average down to the base. This

Sales of tin plate for the last two months brought the average down to the base. This was due, however, to the heavy shipments of plates to Canada in order to fill contracts before the duty on tia plate became effective on May t. The Canadian business was taken at an unusually low price in order to meet competition of the Welsh makers.
